PROPERTY CARE

Property care visit record

The same checklist, run the same way on every visit, so that anything new at your property stands out. What was seen, what has changed since last time, and what needs a decision from you.

PREPARED FOR	PROPERTY
PARISH	HOME SIZE Standard / Large or rental / Villa
VISIT DATE	VISIT NUMBER IN PLAN
PLAN Monthly / Fortnightly / Weekly	REFERENCE

☐ ROUTINE VISIT ☐ PRE STORM ☐ POST STORM ☐ EXTRA VISIT

Prepared by Monique Sewell-Bennett, seven years of UK construction and IoT project management, supplying professional services as a sole trader. The visit is a visual walk round of the areas that could be reached on the day. It is not a survey, a security patrol, or care for anybody living at the property.

A	How to read this record	the marks on each line
B	This visit	who, when, how long, how access was gained

A. How to read this record

Every line is marked twice. **Today** is what was seen on this visit. **Since last visit** is what makes this record useful over time: anything marked New is the first place to look.

Today

OK	**Seen, nothing to report.**
ATTENTION	**Something to deal with.** It is listed in section C with what we suggest.
URGENT	**You were called or messaged while we were still on site.** The time you were told is written against it.
NO ACCESS	**Could not be seen on this visit.** The reason is written against it. A no access line is not an OK.

Since last visit

NEW	**Not there last time.**
SAME	**Unchanged since the last visit.**
WORSE	**Was noted before and has got worse.**
RESOLVED	**Was noted before and is now put right.**

Observations are written as what was seen and where, with the size in words where it helps: "water stain about the size of a dinner plate, bedroom 2 ceiling, corner nearest the road". Not "looks bad", and never a measurement.

Areas that could not be reached on this visit, and why:

C. Needs your decision

The short list. Everything here is also marked on its line further down. We record and suggest a next step; the decision, and anything that costs money, is yours.

#	WHAT WAS FOUND	WHERE	STATUS	PHOTOS	SUGGESTED NEXT STEP	YOUR DECISION
1						
2						
3						
4						
5						

A suggested next step is usually one of: watch it on the next visit, a Visual Check or Condition Report for a closer look, or a trade to quote for the repair through Yaadly.

D. Readings

Taken every visit, in the same place, so a slow change shows up as a number before it shows up as damage.

READING	THIS VISIT	LAST VISIT	CHANGE	NOTE
Electricity meter				
Water meter				
Water tank level (full, three quarters, half, low)				
Fridge or freezer temperature, if left running				
Gas cylinder level, if any				

E. Outside

#	OUTSIDE	TODAY	SINCE LAST VISIT	PHOTOS	WHAT WAS SEEN
1	Gate, padlock and entrance				
2	Boundary wall or fence, all sides				
3	Yard, driveway and paths				
4	Trees and vegetation near the house or the roof				
5	Roof, as seen from the ground				
6	Gutters and downpipes				
7	External walls, all elevations				
8	Windows, grilles and burglar bars				
9	External doors and locks				
10	Outside lights				
11	Post, flyers, notices left at the gate				
12	Signs of entry, damage or somebody staying				

F. Inside

One wide photograph of every room, from the doorway, from the same spot each visit.

G. Water, power and drains

#	SERVICES	TODAY	SINCE LAST VISIT	PHOTOS	WHAT WAS SEEN
1	Water supply on at the main, or left off as agreed				
2	Every tap run for a minute, hot and cold				
3	Every toilet flushed, every drain run				
4	Under sinks, around toilets and the water heater for leaks				
5	Water tank, lid, overflow and pump				
6	Electricity on, board checked for tripped switches				
7	Lights or timers left on as agreed				
8	Septic tank or absorption pit cover, smell, overflow				

H. Pests, damp and storm

#	CHECKS	TODAY	SINCE LAST VISIT	PHOTOS	WHAT WAS SEEN
1	Termite signs: mud tubes, droppings, soft or hollow wood				
2	Rodent signs: droppings, gnawing, nesting				
3	Insects, wasp or bee nests				
4	Mould, mildew, damp smell				
5	Standing water outside (mosquito breeding)				
6	Loose items that would move in a strong wind				

> **Hurricane season, June to November.** Before a named storm: shutters or boards, loose items stored, water tank topped up, drains clear, photographs from the fixed spots. After it, once roads are safe: the same photographs from the same spots, so the before and after can go straight to an insurer.

I. If somebody lives here

For a home with a parent or relative living in it. The visitor notes what they see and passes messages on. They do not give personal care, medication, medical opinion or advice, handle money, or accept gifts. If they are worried, they call the emergency contact below and then you, and write the time here.

J. Carried forward

Items still open from earlier visits. They stay on this list until they are marked resolved, so nothing drops off between visits.

K. Photographs

Every photograph is numbered in the order it was taken and carries the time the camera recorded. A finding elsewhere in this report points to its photographs by these numbers.

What this record is and is not

It is a visual record of what could be seen, on the day, in the areas that could be reached. It is not a survey, a structural opinion, a valuation, a security service, or insurance, and it does not replace the checks your insurer asks for unless your insurer has agreed that it does. Anything outside what a visual check can tell you is referred to the right professional and written in section C.
